Other colours and packaging possible
provided sufficient purchase

✓ Healthier to use

Parasilico Alcoxy 15 (T) is a modern, solvent-free and low-emission construction silicone. The EC1^{PLUS} & A+ labels guarantee the best possible protection of health. The product is practically odourless.

✓ Highest quality product

Alcoxy-based silicone is an European high quality product, made at the DL Chemicals' production site in Belgium.

✓ Glazing sealant compatible with butyl joints and PVB films

Parasilico Alcoxy 15 (T) is compatible with most peripheral insulating glass joints as well as safety glass PVB films.

✓ Save the world, save money

Some colours are available in foil packaging, a more environmentally friendly alternative for cartridges. From reduction in transport volume of empty packaging, to excluding huge amounts of waste and its disposing costs, foil packaging helps to to minimise your ecological footprint. Working with foil packagings also results in more efficient working.
