

**CHARACTERISTICS**

- One component glue
- Very easy to apply
- Can be abraded
- High water resistance
- With filling properties
- Forms a tough end product
- 

**APPLICATIONS**

- Bonding aluminium corner joints of doors and windows. The adhesive can either be applied before assembly, or be injected through the corner holes after assembly. The adhesive gives a significant strength increase in the corners.
- Can also be used as a universal bonding agent for metals, PVC, wood, GRP...

**TECHNICAL CHARACTERISTICS**

Type of product	Polyurethane-prepolymer
Density (g/ml)	1.55
Consistency	Pasta
Application temperature	+15°C - +25°C
Temperature resistance	-30°C - +100°C
Curing system	Reaction by humidity
Dry matter content	±100%
Shelf life of unopened product	12 months
Storage conditions	Store in a dry, cool place at +5°C to +25°C. Keep out of direct sunlight.

**PACKING AND COLOURS**

25 x cartridge 310ML/box - 1200 pieces/pallet

**METHOD OF USE****Preparation**

- The surfaces should be free from dust and grease, degrease if necessary. A dry substrate is not necessary. Moist substrates cause the adhesive to react faster and the adhesive to expand more.

**Application**

- Apply the adhesive to one or both sides to be bonded
- Bring together within the processing time of 10 minutes. When the user chooses to slightly wet the surface, the adhesive reacts faster. In this case, the processing time drops to 5 minutes
- To prevent the adhesive from expanding during cure, the parts to be bonded have to be pressed together

**Cleaning**

- Uncured, redundant product can be removed with acetone.

## SAFETY

Consult the safety information on the packaging and the safety data sheet for more information.

## POINTS OF ATTENTION

- Foams slightly when cured.

## TECHNICAL APPROVALS

- French VOC emission class A+
