COMPONENTS

SUITABLE CONTENT

Type of packaging with maximum content

Cartridge
310 ml

Foil packaging
400 ml

Foil packaging
600 ml

2-component cartridge
2 x 200 ml (mixing ratio 1:1)

Type of product

Light viscous sealants	Medium viscous sealants	Rigid sealants
Parasilico Paracryl Detaflex 	Parabond Paracol 	Parabond (extreme high tack adhesives like Parabond 700, 800...) Parachim Paracol 2C PU 

OPERATION

Break release

The rod is relaxed back again after activation of the trigger. This releases the pressure of the rod on the sealant, stopping discharge and allowing the rod to be pulled back to remove the sealant packaging from the frame.

- Usually activated by means of a **locking plate** at the back of the caulking gun.
- In case of a **trigger integrated break release**, this stopping system is activated by pushing the trigger forward with the fingers. This makes the manual gun **easier to operate with one hand**.

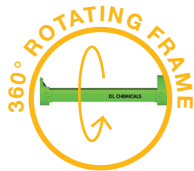

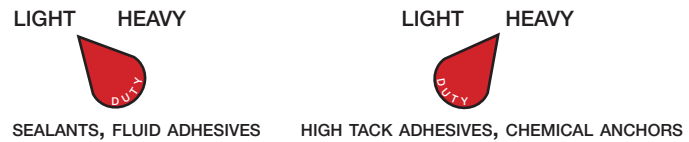

Transmission

Transmission or thrust ratio is the mechanical force transferred from trigger to rod. This force pushes the product out of its packaging. A high thrust ratio provides **more power**, while a low thrust ratio provides **more speed**. For example, with a gun that has an 18:1 thrust ratio, the discharge force of the sealant is half what it would be with a 12:1 thrust ratio gun.

Dual Power Switch

Convenient operation button for **quick and easy switching between thrust ratio** 12:1 for light products and 18:1 for rigid products. Press and turn the button to the desired thrust ratio.

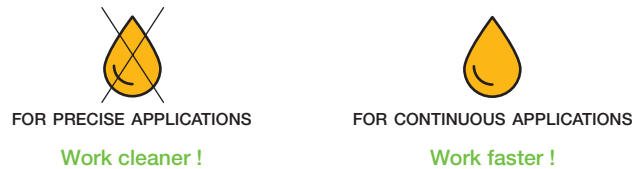

360° rotating frame

A frame that rotates 360° around its axis, making it easy to hold the nozzle in the desired position without having to rotate the manual gun itself. A rotating frame makes the gun **easier to use**.

No Drip Switch

Convenient operation button to easily allow or prevent run-on of sealant from the nozzle after releasing the trigger. By allowing dripping, the user can **work more quickly** in uninterrupted applications and continuous beading. Preventing dripping **reduces product loss and results in cleaner working** in applications with frequent interruptions.

Foil Packaging Adaptor

An accessory that attaches with a nut to the end of the rod and is required for emptying a foil packaging. When cartridges are used in a combi sealant gun, this attachment must be removed with a wrench.

Quick Release Foil Adaptor

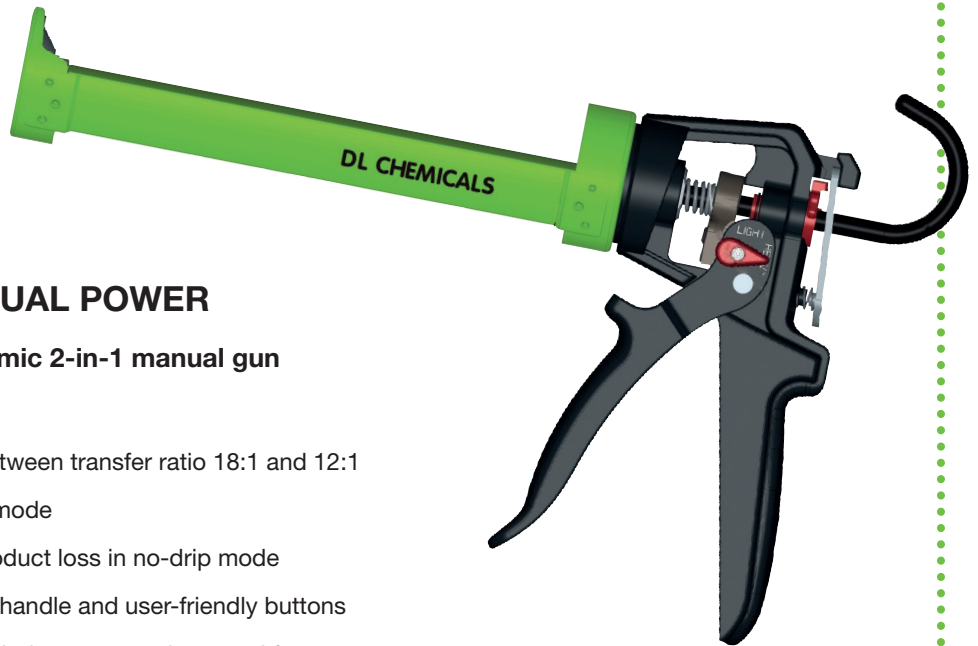

A foil packaging adaptor that can be both easily attached to the rod without a wrench. This increases **ease of use** and allows you to switch between cartridges and foil packaging **faster and without tools** when using a combination sealant gun.

INTENSIVE LONG-TERM USE

A selection of highly wear-resistant and ergonomic models ideal for precise applications.

NEW

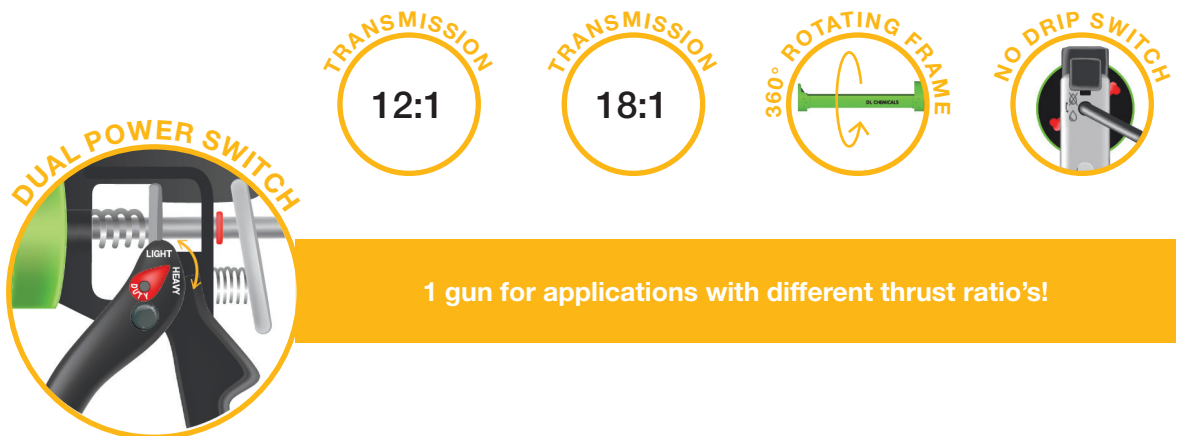

DUALPOWER

DUAL POWER

Ergonomic 2-in-1 manual gun

- ✓ Quick and easy switching between transfer ratio 18:1 and 12:1
- ✓ Smooth, fast sealing in drip mode
- ✓ Cleaner working and less product loss in no-drip mode
- ✓ Ergonomic design with wide handle and user-friendly buttons
- ✓ Increased ease of use through the 360° rotating metal frame
- ✓ Long service life
- ✓ No lubrication of parts required

1 gun for applications with different thrust ratio's!

UNIVERSAL

Ergonomic professional manual gun

- ✓ Smooth, fast sealing in drip mode
- ✓ Cleaner working and less product loss in no-drip mode
- ✓ With ergonomic handle
- ✓ Increased ease of use through the 360° rotating metal frame
- ✓ Long service life
- ✓ No lubrication of parts required

POWERFLOW COX PLASTIC COMBI

Lightweight combination gun

- ✓ The packaging remains visible through the transparent frame
- ✓ Suitable for cartridges and small foil packagings
- ✓ Lightweight thanks to plastic parts
- ✓ Foil packaging adaptor available separately (art. nr. 104431)

ALU COMBI

Ergonomic combination gun

- ✓ Outstanding protection of sealant packaging with the closed aluminium frame
- ✓ Suitable for cartridges and small foil packagings
- ✓ Fast changeover between cartridge and foil packaging without a wrench
- ✓ Smooth, fast sealing in drip mode
- ✓ Cleaner working and less product loss in no-drip mode
- ✓ Increased ease of use through the 360° rotating metal frame
- ✓ With ergonomic handle
- ✓ With durable metal sealing rings
- ✓ Long service life
- ✓ No lubrication of parts required

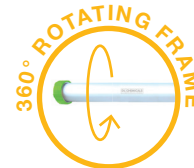

ALU FOIL PACKAGING

Ergonomic manual gun for big foil packagings

- ✓ Outstanding protection of sealant packaging with the closed aluminium frame
- ✓ For big foil packagings up to 600 ml
- ✓ Smooth, fast sealing in drip mode
- ✓ Cleaner working and less product loss in no-drip mode
- ✓ Increased ease of use through the 360° rotating metal frame
- ✓ With ergonomic handle
- ✓ With durable metal sealing rings
- ✓ Long service life
- ✓ No lubrication of parts required

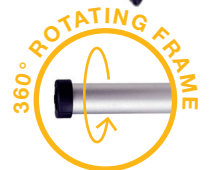

STANDARD USE

These budget-friendly, entry-level models are ideal for applying joint sealants and medium viscous adhesives at standard use.

WT250 ALU COMBI

Combination gun

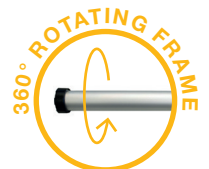

- ✓ Suitable for cartridges and small foil packagings
- ✓ Increased ease of use through the 360° rotating metal frame
- ✓ Outstanding protection of sealant packaging with the closed aluminium frame

WT250 ALU FOIL PACKAGING

Manual gun for big foil packagings

- ✓ For big foil packagings up to 600 ml
- ✓ Increased ease of use through the 360° rotating metal frame
- ✓ Outstanding protection of sealant packaging with the closed aluminium frame

LIGHTWEIGHT

PROFESSIONAL

Lightweight manual gun

- ✓ Easy placement of cartridges in the open frame
- ✓ Light in use

SKELETON

Very light skeleton gun

- ✓ Ideal for small sealing jobs
- ✓ Suitable for low-viscosity sealants
- ✓ Cleaner working and less product loss due to standard no-drip

BUDGET CHOICE

2C

Manual gun for two-component products

- ✓ For side-by-side cartridges 2x200ml with mixing ratio 1:1
- ✓ Solid steel frame
- ✓ Lightweight in the two-component gun category
- ✓ With adjusting screw to correct trigger free play

TRANSMISSION
26:1

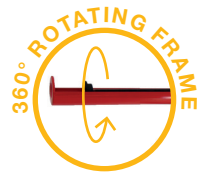

HEAVY USE

These robust and very wear-resistant models can take a beating and feel completely at home on construction sites and workshops.

MK H40

Very sturdy open manual gun

- ✓ Ideal for medium viscous and rigid sealants and chemical anchors
- ✓ Easy one-handed operation thanks to the trigger integrated break release
- ✓ Increased ease of use through the 360° rotating metal frame
- ✓ Long service life
- ✓ High reliability

MK H14

Very sturdy open ergonomic gun

- ✓ Suitable for light and medium viscous sealants
- ✓ Easy one-handed operation thanks to the trigger integrated break release
- ✓ With ergonomic handle in reinforced nylon
- ✓ Increased ease of use through the 360° rotating metal frame
- ✓ Long service life
- ✓ High reliability
